

# Share your passion for medicine.

## Do you agree with these statements?

I care about patients who can't find a doctor, and doctors who can't afford to practice the profession they love.

*That's why the AMA and its members' top priorities are medical liability reform and fixing the Medicare physician payment formula.*

I want all of America's patients to get the high-quality care they need and deserve.

*That's why student members of the AMA help those in need through community service programs, and why the AMA and its members are working together to solve the problem of the uninsured.*

As a medical student, I am concerned about my ability to navigate the challenges I face both today and in the future.

*The AMA and its members are very involved in medical education and are working toward solutions to reduce the financial burden for medical students and are monitoring resident work hours.*

**Be part of the solution. Give strength to the voice of those who have a passion for medicine. Be a member of the AMA.**

## Why join the AMA?

1. Every AMA member has a voice in the decisions that affect students, residents and practicing physicians alike.
2. It's a way for you to turn your energy and passion for medicine into meaningful action on the issues facing medicine today.
3. AMA membership is one way for you to get involved in helping ALL patients, not just those you'll have the opportunity to treat in the future.
4. Stay up-to-date on the clinical, economic, professional and policy issues facing medicine with the *Journal of the American Medical Association (JAMA)*, *Archives* journals and *American Medical News (AMNews)*.
5. Search more than 7,800 accredited residency programs in the country with the AMA's Fellowship and Residency Electronic Interactive Database (FREIDA).
