PROGRESS REPORT FORM INFORMATION

Attached is the AHA's Interim Progress Report Form or Final Progress Report Form to assist you in reporting your research and professional activities during the term of your award. The Report will assist the Association's Research Committee in assessing accomplishment relative to the specific aims of the project. Submission of an annual report is an obligation and responsibility of each awardee.

The Interim Progress Report Form should be submitted by December 15 each year that precedes another funded year. It should be used to summarize each of your project's original aims and the results achieved for each aim during the reporting period.

The Final Progress Report Form should be submitted by the December 15 prior to your award termination. It should be used to list the publications and abstracts that are a result of AHA support. You should include a summary of research results. A progress report is not required for an extension year.

For example, if your award is granted for three years, you should prepare the Interim Progress Report Form in years one and two and the Final Progress Report Form in year three. If your award is granted for four years, you should prepare the Interim Progress Report in years one through three and the Final Progress Report Form in year four.

You are invited to submit additional information about your project within six months following award termination, should you wish to do so.

Please note that one original progress report is due to the AHA by December 15 of each year. The final payment for each year is contingent upon receipt of your progress report. Please mail or fax the completed form to:
