

## Available Post-Doctoral Fellow Position

**Faculty:** Dr. Yahuan Lou

**Department:** Diagnostic Sciences

**Location:** Dental Branch

**Job Description:** Two positions are available for postdoctoral research fellows, funded by NIH, to join a group studying autoimmune disease in the kidney (J.Immunol.167:2388, J. Clin Invest. 109:517) and immune regulation of ovarian function (J.Immunol.182:). The aims of those projects are to elucidate roles of tissue dendritic cells in pathology and physiology using animal models.

Newly graduated Ph.D. in biology or biomedical disciplines is encouraged to apply. Experience in cellular immunology, molecular biology and animal handling would be advantageous, but not required. Compensation depends on quality and previous research experience.

These 2-year positions are available immediately. The institution is located in Texas Medical Center, Houston, one of the biggest medical complex in the world.

Applicants should send their *curriculum vitae*, date of availability, and three names and addresses of professional references to:

Dr. Yahuan Lou  
The University of Texas Houston Dental Branch
