

Postdoctoral Position,

- Molecular Biology, Stem Cells and Cancer
- **Job Hours:** Full-Time
- **Start Date:** Nov 1st, 2011
- **Sector:** Academic

A postdoctoral position is available immediately in the McCarty lab at Institute of Molecular Medicine (University of Texas-Health Science Center) to study the role of signaling pathways in stem cells of lymphoma. Experimental models focus on molecular interactions of genes in various cell lines and primary cells in the context of stem cells and development of B cell lymphoma.

Requirements: Highly motivated PhD, MD/PhD or MD with a solid background in molecular and cell biology. Expertise in the analysis of mouse model systems, molecular biology and immunological techniques such as FACS, cloning, PCR immunohistochemistry etc. is a must. Experience in generation of knock out mice and Chip-chip assay is an advantage.

The McCarty lab is part of a vibrant stem cell community, the Centre for Stem Cell Research at the Institute of Molecular Medicine (IMM) at UT Medical Center in Houston. Interested applicants should send a cover letter explaining relevant work experience, a CV and the names, telephone numbers and e-mail addresses of three references by e-mail to: nami.mccarty@uth.tmc.edu
