

Postdoctoral Fellowship in Research Center for Protein Chemistry

A postdoctoral fellowship in the Research Center for Protein Chemistry is available at the Institute of Molecular Medicine, the University of Texas Health Science Center at Houston. Candidates with PhDs in the field of biochemistry, biology, immunology and/or neuroscience or other related areas are encouraged to apply. Trainees will gain expertise in the areas of isolation of X-isomers of VEGIF and alpha-Synuclein, conduct studies of X-ASyn immunization in transgenic mice for immunotherapy of Parkinson disease and conduct studies of X-VEGF in mouse models.

Please visit detail description of the laboratory at
http://www.uth.tmc.edu/uth_orgs/imm/centers/protein.htm

To apply, please send a CV including a brief statement of research interest and career goal, and the contact information for 3 references (affiliation, email address, and phone numbers) to:

Rowen Chang, PhD
