Postdoctoral Fellow Position in Craniofacial Tissue Engineering

A Postdoctoral Fellow position is available within the Department of Orthodontics at the UTHealth School of Dentistry in the area of craniofacial tissue engineering. The project will involve the development of biomaterials and cell-based approaches for craniofacial and dental tissue engineering applications. An individual with experience in craniofacial and/or orthopaedic tissue engineering, scaffold fabrication and characterization, and cell culture is sought for this opportunity.

Candidates must have completed a Ph.D. in bioengineering or a closely related field.

Interested individuals are encouraged to send a letter briefly outlining career plans, statements of research interests, curriculum vitae, and names and contact information for 3 references to:
