One (1) Post-doctoral Research position is open at the Center for Cardiovascular Genetics. The Research program relates to molecular genetics and biology of hereditary cardiomyopathies. The program requires studies in cell culture and animal models and human biological specimen.

No minimum post-doc experience is required. However, those with experience in molecular genetics and biology, particularly in the Cardiovascular field, would be given top priority.

The successful applicant will work closely with the faculty at the Center.

The interested candidates should email their CV to Ali.J.Marian@uth.tmc.edu
