A postdoctoral research fellow position in Neurosurgery

A postdoctoral research fellow position is immediately available in the Department of Neurosurgery, University of Texas Health Science Center at Houston. We are looking for a highly motivated individual to study novel molecular mechanisms underlying the formation of intracranial aneurysms.

The major research interests in the lab are: (1) to identify genes that predispose individuals to intracranial aneurysms, (2) elucidate the molecular function of novel aneurysm genes, and (3) identify pathways leading to this disease.

A PhD degree in biomedical sciences with solid expertise in molecular biology and cell biology is required. Experience in human and mouse genetics is preferred. The candidate should have excellent oral and written communication skills in English, and have demonstrated scientific productivity.

To apply: Please send an electronic copy of your curriculum vitae and a cover letter at Teresa.santiagosim@uth.tmc.edu. The cover letter should describe:

- Your areas of competence in research
- Areas of competence you wish to pursue during postdoctoral training
- Your career goals
