Post-doctoral fellowship – molecular psychiatry - biomarkers of mood disorders

The Center of Excellence on Mood Disorders at the Department of Psychiatry and Behavioral Sciences, University of Texas Medical School at Huston, Texas, is looking for a post-doctoral fellow. This individual will focus on research that attempts to identify biological targets for psychiatric illnesses. The individual should hold a PhD degree and have broad experience in molecular biology and biochemistry. The ideal person will have experience in western blotting, spectrophotometry techniques, ELISA assays. For this position, an interest in biology and translational research is essential. We are looking for a candidate with excellent communication and interpersonal skills to integrate successfully into an interdisciplinary team. Ability to write scientific manuscripts in English is required.
