Center for Immunology and Autoimmune Diseases
Post-doctoral Position

A post-doctoral position is available for an ambitious young scientist interested in career development in the area of innate immunology in relation to infectious disease and regenerative medicine. Research will involve:

--Generation of tissue-specific KO and humanized mice
--Stem cell biology including tissue culture
--In vivo mouse models of disease
--Flow cytometry and cell sorting
--Confocal Microscopy
--Quantitative analyses including PCR and Luminex

Preference will be given to applicants with less than 5 years post-doctoral experience and to those interested in becoming an independent investigator. Excellent communication skills in English (oral and written) are required.

Interested applicants should send via email their curriculum vitae and contact information for at least 3 references to Rick.A.Wetsel@uth.tmc.edu
