

The Centre for Stem Cell Research housed in the IMM, a state-of-the-art facility in the heart of the Texas Medical Center, is seeking a Post Doctoral Fellow with well documented experience in mesenchymal stem cell (MSC) biology.

To be successful in this position you will be self motivated and have extensive experience in MSC biology including in vitro and in vivo bioassays for MSC properties. You will have advanced skills in fluorescence activated cell sorting (FACS) and expertise in immunohistochemical staining techniques. Experience in rodent experimentation is advantageous.

This position is available for immediate start.

Please send your CV and the names, email addresses and phone numbers of three (3) referees to:

Dr Jeannie Ann Javni  
Research Manager  
Centre for Stem Cell Research  
1825 Pressler St  
Houston
