

A postdoctoral fellow position is open immediately in Dr. Yi-Ping Li's lab for the study of striated muscle remodeling. The research is supported by NIH R01 grants. Techniques of cellular and molecular biology will be used *in vitro* and *in vivo* to elucidate signaling mechanisms that regulate skeletal muscle wasting, regeneration and heart failure. Highly motivated individuals with a recent Ph.D. degree and demonstrated capability in research are encouraged to apply. Applicants should forward cover letter and CV to Dr. Yi-Ping Li, Dept. of Integrated Biology and Pharmacology, University of Texas Health Science Center at Houston, Room R376, 6431 Fannin, Houston, TX 77030; or e-mail to Yi-Ping.Li@uth.tmc.edu
