

Postdoctoral Fellow Position

Description:

Postdoctoral Fellows with strong experimental experience and interest in the areas of tissue regeneration are sought to join the Houston Biomaterials Research Center with the University of Texas Health Science Center at Houston. The Lab particularly emphasizes development of multidisciplinary and novel approaches to address relevant biomedical questions in hard tissue applications. Highly motivated candidates with experimental background, a strong academic and publication record, and the ability to work independently and collaboratively with a strong commitment are invited to apply. Interested candidates should send a cover letter, their CV, and the names and contact information of three references electronically to the email address given below. The position is open immediately.

Qualifications:

Applicants should have completed a PhD in Biomedical Engineering or related field, including Materials Science and Engineering, Electrical Engineering, Biology, and Mechanical Engineering, with a strong background in material synthesis and biological evaluation. Applicants with hands-on experiences in scaffold preparation and cell engineering for bone and cartilage regeneration are highly encouraged to apply.
