

Electives

1. Chose an elective (research, IM consult month, other specialty month, etc). The link below has a list of available electives.
2. Find an attending who will be supervising you daily during the month.
3. Turn in your filled-out research electives form (located on the website below) to Dr. Barker for approval.
4. Once you are notified of your approval, email Charity (Charity.A.Sembera@uth.tmc.edu) with what you are doing for your elective as well as the attending who will be evaluating you.
5. Fill out all other appropriate forms if needed (per the website).
6. You are still responsible for going to your continuity clinic during this month.

NOTE: **Remember, research months anywhere AND electives at MDACC take 2-3 months

at least to get everything set up in time so please start ASAP!***
