Program Overview, Target Audience and Objectives

This conference will provide an overview of current and changing concepts in the care of children with cardiovascular problems. The activity has been designed for physicians in pediatric, general and family practice, as well as neonatologists, nurses and medical assistants.

At the completion of this conference, participants will be better able to:

- Recognize and diagnose cardiac problems in the pediatric patient
- Incorporate guidelines for more effective private-practice management of the pediatric patient with heart disease
- Identify available alternatives in the treatment of congenital and acquired heart disease in infants and children
