

Management of Data and Research Record

Sharing Research Data

Neuhauser

- National Research council of the National Academy of Science recommends the regular practice of sharing data
- 4 recommendations to journals:
 - o must include data and enough information to replicate it, author must be willing to provide additional detail on request as space is limited
 - o journals should publish replications and secondary analyses of studies
 - o good citations and credit given to those who did work are mandatory
 - o encourage authors to make data available
