Postdoctoral Research Fellow Position

Description:

- The position is in molecular genetics and genomics of cardiovascular diseases
- The ideal candidate will have hands on experience in advanced molecular genetics and genomics techniques including RNA-sequencing & epigenetics methods
- The candidate either should have experience in characterization of cardiac phenotype in genetically modified mice
- The candidate must be highly motivated and possess the ambition to pursue an independent research career in the future
- The candidate should have strong academic and publication record
- The candidate must have the ability to work independently as well as collaboratively

Qualifications:

- Applicants should have completed a PhD in molecular genetics, genomics, molecular biology or related field.

  Interested candidates should send a cover letter, their CV, and the names and contact information of three references electronically to: Ali.J.Marian@uth.tmc.edu

(No Phone Calls please)
