POSTDOCTORAL RESEARCH FELLOW POSITION
Clinical and Translational Research Program on Traumatic Stress

The UTHealth Department of Psychiatry and Behavioral Sciences at the McGovern Medical School at the University of Texas Health Science Center at Houston is seeking a full-time Postdoctoral Research Fellow to assist with a series of studies focused on understanding the cognitive and affective risk factors for PTSD and the application of novel methodologies such as neuromodulation to improve treatments for PTSD. The candidate will have an opportunity to participate in preparing manuscripts for publication and gaining clinical hours for licensure.

Responsibilities for this position include:
1) Study coordination and oversight of study procedures
2) Supervision of data collection and management
3) Preparation of IRB material
4) Assistance with data analysis and interpretation
5) Preparation of manuscripts for publication and grant applications

The ideal candidate has strong research potential, is highly motivated, and will have a strong background in trauma/PTSD research.

Qualifications:
- Completion of a Ph.D. in Clinical Psychology (or related disciplines) from an APA accredited doctoral program and relevant research experience
- Content knowledge of PTSD research and clinical experience with trauma-exposed individuals
- Proficiency in statistical analysis programs including SPSS or MPlus
- Strong interpersonal, communication, and organizational skills

Interested applicants should forward a CV and a statement of qualifications and research interests for this position, as well as the names and contact information for three professional references.
