Postdoctoral Research Fellow Position Available

The University of Texas Health Science Center at Houston
School of Dentistry
Department of Endodontics

We are seeking a highly motivated, organized and enthusiastic postdoctoral fellow to engage in studies of molecular and regenerative focus in endodontics. Our research focus is to understand the cellular and molecular basis of apical periodontitis in order to develop strategies for regeneration of dental pulp tissues. Current projects utilize molecular and cell biological approaches, in vitro and in vivo. Job tasks include: perform research activities and support lab projects under the direction of the principal investigator, maintain records and experimental results and write manuscripts for publications.

Applicants with a D.D.S. and Ph.D. and additional training in Endodontics are encouraged to apply. A postdoc experience of 0-2 years is preferential. The candidate must have the ability to work independently and possess the ambition to pursue an independent research career in the future. Salary and benefits are commensurate with relevant experience. Review of applications will continue until the position has been filled.

Please send a CV, cover letter indicating research interests and the name/email addresses of three references to:
