

Dentistry by John Barras

Dentistry by John Barras offers the newest innovations in computer consultation for our procedures. Dr. John Barras and associates will walk you through the process and educate you on all procedures, general and cosmetic. These include minimal and no-prep veneers, Invisalign, implants, TMJ treatment, smile makeovers and a variety of whitening procedures including Zoom. Dr. Barras spends plenty of time with each patient on education and information about customized treatment options. This helps give the patient a better idea of what to expect.

The benefits of choosing our office include technology, comfort, patient care and extensive training. We use digital x-rays, flat screens and intraoral pictures, and all Porcelain Crowns in one visit. Sedation dentistry can be provided with I.V. anesthesia if you desire.

We invite you to request a complimentary consultation to receive a full diagnostic work-up worth \$375. This includes digital photos, digital x-rays, digital pan and a complete evaluation. We look forward to giving you the dental health and smile that you are looking for.

Dr. John Barras, 1330 Post Oak Blvd., Suite 1300, Houston, Texas 77056, 713.993.9814, www.johnbarrasdds.com

Cardiac research studies

The Weatherhead PET Imaging Center for Preventing and Reversing Atherosclerosis is seeking volunteers for two new and innovative cardiac research studies. All research study-related tests and consultations are at NO cost; paid parking.

The Coronary Blood Flow Study is to compare blood flow in the arteries with cardiac PET (Positron Emission Tomography) using different imaging techniques. Patients over the age of 40 will undergo 2 cardiac PET scans within 8 weeks; a complete cardiac consultation and lifestyle evaluation by a faculty cardiologist will be provided after the second scan. For more info, see healyourheart.info.

The CENTURY Health Study, a 5-year research study focusing on prevention and non-invasive treatment of heart disease, compares 2 strategies for treating heart disease. Study participants will undergo 3 cardiac PET scans during the 5-year course of the study. If you have been diagnosed with blockages in your heart (have had a heart attack, bypass surgery, a heart balloon procedure, or stents to your heart) OR have at least 3 risk factors for heart disease, you may be eligible to participate.

For more info, visit CENTURYHealthStudy.org. For questions or to participate in either of these studies, e-mail us at ms.century@uth.tmc.edu or call us at 713-500-5200.

Be nice to your feet today!

For more than 20 years
