

# Keeping pets safe

Houston resident Sandra had plenty of problems with her husky, Sitka – everything from behavioral problems to him running off. Then she installed the Invisible Fence Brand system to keep Sitka home safe. This is what she had to say: “I would like to share how great this product is for you and your dog. We have a husky, and he wouldn’t listen to us or come to us when he is called. To keep him safe, we installed an Invisible Fence around our acre of land. Well, it worked! The fence has trained him well. We have made some changes to the fenced area, and he has learned to stay out of those areas very quickly. I would never be without my Invisible Fence, and in fact we have built a second home in New Mexico and will be adding a fence there too.”

Schedule a free in-home consultation today so Invisible Fence of Houston can come up with a customized solution especially for you.

Invisible Fence of Houston, 10500 NW Freeway #201, Houston, Texas 77092, 281.257.6411, [houston.invisiblefence.com](http://houston.invisiblefence.com)

# Cardiac research studies

The Weatherhead PET Imaging Center for Preventing and Reversing Atherosclerosis is seeking volunteers for two new and innovative cardiac research studies. All research study-related tests and consultations are at NO cost; paid parking.

The Coronary Blood Flow Study is to compare blood flow in the arteries with cardiac PET (Positron Emission Tomography) using different imaging techniques. Patients over the age of 40 will undergo 2 cardiac PET scans within 8 weeks; a complete cardiac consultation and lifestyle evaluation by a faculty cardiologist will be provided after the second scan. For more info, see [healyourheart.info](http://healyourheart.info).

The CENTURY Health Study, a 5-year research study focusing on prevention and non-invasive treatment of heart disease, compares 2 strategies for treating heart disease. Study participants will undergo 3 cardiac PET scans during the 5-year course of the study. If you have been diagnosed with blockages in your heart (have had a heart attack, bypass surgery, a heart balloon procedure, or stents to your heart) OR have at least 3 risk factors for heart disease, you may be eligible to participate.

For more info, visit [CENTURYHealthStudy.org](http://CENTURYHealthStudy.org). For questions or to participate in either of these studies, e-mail us at [ms.century@uth.tmc.edu](mailto:ms.century@uth.tmc.edu) or call us at 713-500-5200.
