

Postdoctoral Research Fellow

Applications are invited for a postdoctoral position in proteomics in the Institute of Molecular Medicine, University of Texas Health Science Center at Houston (UTHealth). Ph.D. or equivalent in a related scientific field is required. The lab focuses on development and application of proteomics and other molecular techniques to study cancer and other diseases.

We are seeking candidates who are highly motivated, science-driven, collaborative, and have excellent writing and verbal communication skills to join our research team. An ideal candidate will have a strong background in proteomics, and possess hands-on experience in HPLC and mass spectrometry. Previous experience with metabolomics, bioinformatics, functional genomics, glycobiology, cell culture and biological assays will be considered as additional advantages.

To apply, please email CV, contact information for three references, and a statement of research experience and goals to: proteomics@uth.tmc.edu

Equal Employment Opportunity Statement

UTHealth is committed to providing equal opportunity in all employment-related activities without regard to race, color, religion, sex, sexual orientation, national origin, age, disability, genetic information, gender identity or expression, veteran status or any other basis prohibited by law or university policy. Reasonable accommodation, based on disability or religious observances, will be considered in accordance with applicable law and UTHealth policy. The University maintains affirmative action programs with respect to women, minorities, individuals with disabilities, and eligible veterans in accordance with applicable law.
